**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12, are rejected under 35 U.S.C. § 103 as being unpatentable over U.S. Patent #5,884,271 to Pitroda ("Pitroda" hereinafter) in view of U.S. Patent #5,767,896 to Nemirofsky ("Nemirofsky" hereinafter).

Pitroda discloses a multifunctional data card for carrying personal information about a user, said card comprising:

a housing having a generally rectangular shape (see figures 1, 3) and including a keypad (see e.g. figures 9-21) for initializing a selected program and for entering a user access code unique to the selected program,

a microprocessor 33 disposed within said housing and being programmable via said keypad for processing data associated with a plurality of banking accounts (see figure 4) that are owned by a user;

a display panel 30 operably connected to said microprocessor and for displaying information associated with the selected program so that a vendor may access data corresponding to the selected program;

a fingerprint pad (see claim 9) attached to said microprocessor for verifying a cardholder identity;

a memory connected to said microprocessor (see figure 3) and for storing user data therein so that said card will be switched to an inoperable mode after a predetermined number of unauthorized attempts to access said card have been executed, and

a power supply source 301 disposed within said housing and electrically coupled to said microprocessor.

Pitroda does not disclose the display of a bar code to input information to a vendor.

Nemirofsky discloses that a bar code may be displayed on a smart card LCD in order to display and redeem coupons by having a vendor scanning them in at a POS. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to use the card of Pitroda in a coupon redemption scheme as taught by Nemirofsky by having the display of Pitroda output a bar code, as taught by Nemirofsky, because this arrangement would allow the holder of a card according to Pitroda to redeem coupons, at shops, thereby increasing sales for the shops.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patents #5,907,142, #6,012,636, and #5,623,552 are cited for showing fingerprint scanners on smart cards.

U. S. Patents #5,192,947 and #4,667,087 are cited for showing smart cards which display bar codes.

U. S. Patent #5,276,311 is cited for showing another multi-function smart card.
